AI Studio Challenge: Participant Briefing

Overview

Each team has exactly 1 hour and 30 minutes to create a 1:00–1:30-minute AI-generated video on a topic revealed on the day of the event. Professional AI video generation tools will be provided, with a fixed pool of credits per team shared across two models. No additional credits will be available. The challenge evaluates creative planning, resource management, and storytelling under time constraints.

Teams

Each team must comprise exactly 3 members, working collaboratively on planning, AI content generation, video editing, and resource management.

Format and time

The topic will be revealed at the start of the challenge. Teams will have exactly 1 hour 30 minutes, covering planning, generation, editing and final export. The completed video must be submitted before the deadline; unfinished submissions will not receive a score.

Video requirements

The final video must be between 1:00 and 1:30 minutes in duration. Videos outside this range will incur point deductions. The submission must address the announced topic and be presented as one complete, cohesive video rather than a collection of separate clips.

Tools, models and credits

All teams will have access to the same two AI video generation models and a fixed pool of credits per team, shared across both models. Credits cannot be topped up, transferred, or borrowed from other teams. Once a team exhausts its allocated credits, no further generations can be made using the provided tools.

Outside tools: Teams may use additional tools only if they are completely free, such as free video editors, music libraries, or voice-generation tools. Paid software, subscriptions, and credits beyond those provided are strictly prohibited. Free trials requiring payment details are also not permitted.

Rules and constraints

- Teams of exactly 3 members
- Total duration is 1 hour 30 minutes, from topic reveal to final submission
- The topic will be revealed only on the day of the event
- The final video must be between 1:00 and 1:30 minutes in duration
- One fixed credit pool per team, shared across both models, no top-ups
- No use of paid software other than the ones provided
- All content must be created during the challenge; pre-made or external assets are prohibited
- All decisions made by the organisers and judges are final

Judging rubric

Judges score each video out of 100 using the criteria below.

Criterion	Points	What judges look for
Concept and storytelling	25	Clear idea, strong opening, a beginning, middle and end that fit the topic
Relevance to the topic	15	The video clearly answers the topic given on the day
Visual quality and consistency	20	Sharp, coherent visuals; consistent style, characters and look across clips
Smart use of models and credits	15	The higher-tier model used where it counts, the low-tier model used wisely, no wasted credits
Editing and polish	15	Smooth cuts, pacing, audio, text and transitions; feels finished
Compliance and creativity	10	Length within 1:00 to 1:30 minutes, rules followed, original and memorable approach
Total	100	

Tie-break: higher score in Concept and storytelling.

Tips

- Finalise a simple, clear concept within the first 10 minutes
- Test prompts on the low-tier model before using higher-tier credits for key shots
- Keep a watch on credit usage throughout the challenge to avoid running out before completion.
- Maintain consistency in characters, colours, and visual style
- Reserve the final 10 minutes for export and submission; late or invalid files will not be scored
